*Orobix's mission is to bring intelligence into tools to improve the customer ability of managing increasing levels of complexity, flexibility and efficiency not feasible with traditional technologies.*

*Orobix is oriented to the Continuous Improvement, Customer Satisfaction, meeting Customer requirements and compliance with statutory and regulatory requirements.*

*The Top Management is committed to maintain the effectiveness of the Quality Management System and believes these targets can be reached through the dissemination of the Policy and its understanding within the organization.*

*The entire organization is committed to comprehend customers' needs and to develop safe and reliable products that can exceed customers' expectations, providing a high level of innovation and customization. The compliance with internal procedures and the respect of statutory requirements are key elements of this process.*

*The improvement of the quality of time usage and the quality of production processes are primary quality objectives that every employee has to persecute to increase the responsiveness to customers and improve productivity and effectiveness in the use of all resources.*

Pietro Rota, CEO
